---

Folks,

The Gulfco Respondents have proposed using the generic background levels in the attached document on page 30. One issue that occurs to me is if these background levels are above the Gulfco screening levels, then I'm thinking that site related background samples should be obtained. Anyway, please let me know any thoughts you may have on this.

Thanks,

Gary Miller

Subject Background Soil Reference

01/19/2007 10:14 AM

Hi Gary -

Per our discussion yesterday, attached is the Region VI document we would like to use as a reference for background soil concentrations. The table of background soil concentrations is provided on page 30 of the document.

Thanks.
